

# Avoiding non-Compliance in Packaging Operations

How to avoid Mix-Ups, Contamination and Labelling Issues

#### **SPEAKERS:**

David Abraham QRS & Project Leader in the development of the PS 9000:2016

Maren Göpfert Boehringer Ingelheim Pharma

Dr Afshin Hosseiny ECA & former Director of Quality Assurance, GSK

Dr Jean-Denis Mallet ECA & Former Head of the Pharmaceutical Inspection Dpt. AFSSAPS

26-27 February 2019, Berlin, Germany

#### **PROGRAMME:**

- GMP requirements & guidelines for packaging operations
- Requirements for packaging facilities
- Cleaning and hygienic concepts for packaging areas
- Specific QA systems for packaging operations
- GMP-Design Aspects for Packaging Lines
- Fundamentals of primary and secondary packaging materials
- Printing, coding, reading: Authentication of medicinal products
- Workshops & Interactive Sessions:
  - Qualification and Validation
  - Secondary Packaging (including Medical Devices)
  - Packaging of highly potent products
- Qualification/Auditing of suppliers of packaging materials according to PS 9000:2016

#### Avoiding non-Compliance in Packaging Operations

26-27 February 2019, Berlin, Germany

#### **Objectives**

This GMP training course aims at easily explaining the GMP requirements for packaging of medicinal products. This includes requirements for premises and equipment but also for QA operations like documentation, line clearance, validation etc.

#### **Background**

Packaging of medicinal products, blistering as well as cartoning for example, plays a crucial role in the quality and safety of a medicine. Deficiencies of primary packaging may alter the efficacy or stability of a product; failures in secondary packaging may do harm to patients even worse when products or the folding boxes are mixed up. Therefore, packaging is defined as (the last) pharmaceutical manufacturing step and one of the most critical ones. It is not surprising that the biggest part of recalls is caused by failures during packaging. The FDA reported that more than 30% of recalls of tablet products during the last 5 years were caused by label mix-ups, incorrect packaging or incorrect products insert. On the other hand, despite the high criticality of the packaging process, the packaging plants are required to cut the costs and raise their efficiency.

Another challenge for the packaging units is the new **EU** Directive, requiring safety features and authentication measures in order to raise the hurdle for drug counterfeiters. As a consequence of the "COMMISSION DEL-EGATED REGULATION (EU) 2016/161", the rules apply from 9th of February 2019 onwards except for some member states with an existing Verification System. Packaging lines have to be equipped with systems for printing and reading two dimensional codes (2D-Codes) and these systems have to be linked to the materials management system. Companies already shipping serialized products have been reporting from technical hurdles which should not be underestimated. Most companies without experience in this field will need external help. But technical expertise could become rare in the near future.

There are **numerous requirements** which have to be fulfilled in the packaging plant. During this GMP course we will focus on:

- Compliance & QA requirements
  - QA Systems
  - Hygiene and Cleaning
  - Qualification / Validation
- Technological aspects
  - Facility and Zone Concepts
  - Design of packaging equipment
- Packaging materials
  - Handling, storage and mix-ups
- Suppliers
- Special topics:
  - Serialisation & Authentication
  - Highly Potent Products

#### **Target Audience**

Staff from QA and production engaged in packaging operations is the target group of this course as well as suppliers for equipment and packaging material used for packaging of medicinal products.

#### **Programme**

#### **GMPs** and **QA** oversight for packaging operations

- GMP requirements in the packaging unit
- Important Guidelines and standards
- QA Systems relevant for packaging operations
- Frequent inspection findings

## General GMP requirements for Packaging Operations / Key Compliance Challenges for Packaging Operations

- Handling and storage of packaging materials
- Testing
- Stability issues
- Material storage, returned goods, quarantine
- Line Clearance
- Documentation practice
- Practical GMP aspects
- Good and bad practice

#### Packaging facilities & premises

- Requirements for the technical building equipment
- Zone Concepts for primary and secondary packaging
- Air-Lock concepts
- Hygiene
- HVAC

#### **GMP Design Aspects for Packaging Lines**

- Design criteria for blister machines, cartoners, labelers
- Differences to aseptic filling / packaging
- What is critical?
- What to write in an URS?

#### Case Study: Serialization and Aggregation -How we implemented, what worked and what didn't

- Areas to be addressed: IT system carton processes
- Challenges in the implementation phase
- Equipment qualification/ process validation
- Packaging material management
- Impact on the Supply Chain

#### **Workshops & Interactive Session**

#### Workshop on Qualification and Validation

- Equipment qualification
- Process validation
- Critical issues which have to be tested
- How to test?

#### **Workshop on Packaging**

Secondary Packaging (including Medical Devices)

# Interactive Session on Packaging of highly Potent Products / Q&A Dynamic session on packaging (tips & problems)

- Cross Contamination how to avoid it:
  - 1 dedicated Vs multi product facility
  - 2 production planning
  - 3 cleaning procedures
  - 4 people movement

### Case Study: Quality and Compliance systems in the packaging plant

In this case study the different systems in place in a packaging plant of Boehringer Ingelheim GmbH & Co. KG at Ingelheim site are presented, e.g.

- Hygiene and Zone Concepts
- Material flow
- Line clearance procedure
- IPCs in the packaging process
- Documentation and control
- Handling of variable printing data

#### How to minimize risk in Sterile Packaging

- What can go wrong in sterile packaging?
- How to minimize these incidents applying QRM principles.
- Aseptic filling and terminal sterilization:
  - Microbiological quality of the primary packaging components
  - Media Fill
  - Container Closure Integrity (CCI)

#### The application of GxP in packaging supply

- Relevant ISO standards
- Introduction to British "GMP for Packaging Materials": PS 9000:2016

#### Reducing risk through supplier auditing

- How much GMP must a supplier have?
- Practical audit aspects: what to examine?
- Qualification of suppliers

#### Moderator

Dr Afshin Hosseiny

#### **Social Event**

On the evening of the first day, you are cordially invited to a social event. This is an excellent opportunity to share your experiences with colleagues from other companies in a relaxed atmosphere.

#### **Speakers**

#### **David Abraham**

Quality Resource Solutions-Associates
David has extensive experience in both
business and Quality Management. David's background has seen him working
both with and within the print and packaging arena as well as pharmaceutical manu-

facturing organizations; designing, developing, implementing, maintaining and improving business processes in line with the application of pharmaceutical Good Manufacturing Practices. He provided input in the development of a number of industry guidance and standards and was project leader in the development of the PS 9000 series of standards and guidance. His work continues to see his engagement across the industry, supply chain and training organisations providing resource, awareness, training and consulting in quality management and the application of GXP.

Maren Göpfert

Boehringer Ingelheim Pharma GmbH & Co. KG

Maren Göpfert is a chemical engineer. She is Head of Product- and Process-Technology including the Center of Competence for Device- and Packaging-Technol-

ogy at Boehringer Ingelheim GmbH & Co. KG at Ingelheim site. She was previously Head of packaging solid forms at the Pharma Production Department. She also used to work in the automotive and aerospace industry during many years at various positions including Production Management, Project Management, Engineering and Consulting.

**Dr Afshin Hosseiny** 

Tabriz Consulting Limited, Great Britain
Dr Afshin Hosseiny is Managing Director
of Tabriz Consulting Ltd. Before working
as a consultant, he was Director of Quality
Assurance for the Global Supply Network
of GlaxoSmithKline.

**Dr Jean-Denis Mallet** 

ECA, former head of the French Inspection Department AFSSAPS, NNE Pharmaplan Jean-Denis Mallet is a pharmacist. He was previously the Head of the Pharmaceutical and Cosmetics Inspection Department at the French Health Products Regulatory

Agency (Afssaps=ANSM). He also used to work in or with the pharmaceutical industry during many years at various positions including Quality Assurance, Production Management, Engineering and GMP Consulting. He has also been auditor of the International Red Cross. Now he is member of the ECA advisory board and works for NNE Pharmaplan.

Reservation Form (Please complete in full)

If the bill-to-address deviates from the specifications on the right, please fill out here:
